

# MICHELE CLAIBOURN

I am a research director – a senior data scientist, political scientist, community-engaged scholar, and senior administrator – with 20 years of experience teaching, leading, and managing research and data science teams. Recently I've been building and leading Research Data Services<sup>7</sup> in the UVA Library.

My own work has turned towards action-based research, using the tools of data science to promote accountable governance<sup>2</sup>, make visible racial and other social inequities<sup>3</sup>, and impact public policy and movement building. I am always interested in opportunities to use my experience and skills towards creating a more economically and socially just world.

### Leadership

Consult with researchers and design research projects with partners seeking to better understand racial disparities and social structures, and to develop a policy response.

Founded StatLab<sup>4</sup>, a data science consulting service for members of the UVA community where I continue to serve as a senior consultant and to mentor student fellows.

Build a new division of the library enhancing our ability to support the growing data science research community at UVA, recruiting, hiring, and managing a team with diverse skills and talents to meet emerging university research needs.

Supervise a team of 10-12 full-time staff, 3-4 graduate fellows, and research teams across multiple collaborations on a range of research projects, including work on equity and COVID response in the Charlottesville community, racial disparities in the local child welfare systems, forced displacement events with humanitarian partners, and additional community-oriented and library-directed data science efforts.
